

## FREE TOOLS FOR E-PUBLISHING PROS

We're B2B publishing automation experts. But sometimes we also come up with ingenious stuff for *desktop* publishing. It's sort of like what Tang was to NASA—valuable by-products of our core mission. E-publishing professionals love them, and now you can have them ... *for free!*

[SiliconPublishing.com/resources](https://SiliconPublishing.com/resources)

- 1 Access a huge image library without leaving CS.**
- 2 Extend InDesign with a set of scripts by Olav Martin Kvern that let you export indexes to ePub, retain HTML formatting, convert paths to FXG or SVG, explode a selected path into smithereens, and much more.**

These are *unsupported* freebies. All we ask is that you not sell them; credit us by name and link if you share; and rave about us everywhere you go. (Or at least call us when your company needs the world's best publishing automation experts.)
