With apps from the Pebble Appstore, you can get a Pebble to take photos; adjust the temperature of your home before you get there; pay for coffee at Starbucks; check stocks and sports scores; find your destination; control music in your smartphone; and create some ready-to-go texts like, "Driving, can't text," or "I'm on my way," or "I love you!". The BBQ Steak Timer app tells you when it's time to flip the burgers or ring the dinner bell, so you can go enjoy the party after you fire up the barbie. Freecaddie is a GPS golf rangefinder with all kinds of golfer info, like ratings and locations of over 25,000 golf courses world-wide.

Those are just some of the thousands of ways you can simplify life with a tap on the wrist.

time to simplify.
